Peer Review Process

1. Each article is reviewed by two independent reviewers not affiliated to the place of work of the author of the article or the publisher.
2. For all publications, at least one reviewer's affiliation should be in a different country than the country of the author of the article.
3. Author/s of articles and reviewers do not know each other's identity (double-blind review process).
4. Review is in the written form and contains a clear judgment on whether the article is to be published or rejected.
5. Criteria for qualifying or rejecting publications and the reviewing form are published on the journal's website.
6. Identity of reviewers of particular articles or issues are not revealed, the list of collaborating reviewers is published once a year on the journal's website.
7. To make sure that journal publications meet highest editorial standards and to maintain quality of published research, the journal implements procedures preventing ghostwriting and guest authorship. For articles with multiple authorship, each author's contribution needs to be clearly defined, indicating the contributor of the idea, assumptions, methodology, data, etc., used while preparing the publication. The author submitting the manuscript is solely responsible for that. Any cases of academic dishonesty will be documented and transferred to the institution of the submitting author.

Online Submissions - <https://journals.umcs.pl/ismll>

Registration and login are required to submit items online and to check the status of current submissions.

Cognitive Linguistics and Beyond: From Conceptual Mechanisms to Theoretical Aporias
